Keep your students and staff cyber-safe.

- Provide students, faculty, and staff with a single username and password to access all of their important accounts.

- Implement access controls that actually match policies—by location, device, time of day, browser version, and more.

- Control social media, personal account use, uploads, downloads, copy-paste, email, flash drives, and other sharing methods.

- Enable all of your users, including students, to manage, set, and reset their own passwords without IT staff.

- Protect, manage, control, and audit HIPAA data, student work, and other kinds of data to ensure safety and honesty.

Students

- Single sign-on enables students to log into all their apps without having to track many passwords

- Data controls help to prevent homework sharing, cyberbullying, and device misuse

- Student-managed password set and reset reduces IT team workload and missed homework

Faculty and Staff

- Single sign-on makes faculty life easier while providing centralized access management

- Data loss prevention reduces HIPAA accidents

- Native MFA and passwordless FIDO2 add security

IT Team

- Deploy SSO, MFA, access control, and DLP on a schools-compatible budget

- Implement controls in the Microsoft and Google universes that schools use

- Manage, audit, and report all in one place

Let our team give you a tour.

Veteran team members that do business in education and some of the largest school districts in the United States can assemble the right solution for you.

PlurilockAI

Datasheet for the IT Folks

Compatible with the systems you use and ranked #1 in customer satisfaction.

SSO COMPATIBILITY

- Cloud applications offering security assertion markup language (SAML) support for single sign-on (SSO) access
- Cloud applications not offering SAML support through custom lightweight integration with existing login workflows
- Active directory and LDAP integration

NATIVE MFA CAPABILITY

- Temporary one-time password (TOTP) via SMS
- FIDO2 passkey via mobile

ACCESS CONTROL

- IP address
- Time of day
- Geolocation
- Device ID
- Browser version

CASB COMPATIBILITY

- Google Workspace / Google G Suite
- Google Drive
- Microsoft 365 / Office 365
- Microsoft OneDrive

EMAIL DATA LOSS PREVENTION

- Regex ruleset creation
- Google Gmail
- Microsoft Outlook and E3+ email

ENDPOINT DATA LOSS PREVENTION

- Preview notify or block
- Local download notify or block
- Clipboard copy-paste notify or block
- Delete notify or block
- Attachment download notify or block
- External transmission notify or block
- Containerization
- USB device block

PERSONAL DATA AND ACCOUNT BLOCK

- Google Workspace / Gmail
- Microsoft 365
- Dropbox
- Github

DEPLOYMENT

- Lightweight endpoint agent
- Browser extension
- Windows, Mac OS, Chrome OS, Linux
