

CISO 360 Baseline Assessment

A Clear, Executive-Ready View of Your True Security Posture

68% of security leaders cite lack of executive alignment as their top challenge

The CISO 360 Baseline Assessment delivers a structured, executive-level understanding of your organization's actual cybersecurity posture across technology, operations, governance, and culture. Designed for CISOs, VPs of Security, IT Directors, and business leaders, this practical baseline informs real decisions—not checkbox exercises or theoretical maturity models.

Grounded in Reality, Built for Action

Using a guided, domain-by-domain review, we assess incident readiness, cloud and IoT realities, data protection, identity governance, operational security, compliance alignment, and organizational ownership. The result is a concise, defensible view of where risk truly exists—and what matters most right now.

What This Assessment Covers

Technology & Infrastructure

- **Incident Response Readiness** - Context, decision pressure points, and response capabilities
- **Cloud, On-Prem, SaaS, and IoT Reality** - Actual asset inventory and hybrid environment assessment
- **Monitoring & Logging** - Visibility gaps and detection capabilities
- **Vulnerability Management** - Exposure tracking and remediation operations

Data & Identity

- **Data Protection** - Sensitive data flows and protection mechanisms
- **Secrets Management** - Credential hygiene and cryptographic practices

- **Identity & Access Governance** - Authentication, authorization, and privilege management
- **Third-Party Trust Boundaries** - Vendor access and supply chain security

Development & Operations

- **Software & Firmware Security** - Application security and code integrity
- **CI/CD Security Practices** - Pipeline security and deployment controls
- **Business Continuity & Resilience** - Recovery capabilities and operational dependencies

Governance & Culture

- **Program Alignment** - ISO, SOC 2, and regulatory framework readiness
- **Team Structure & Ownership** - Roles, responsibilities, and accountability
- **Board-Level Visibility** - Executive communication and risk reporting
- **Security Culture** - Organizational awareness and engagement

What You Walk Away With

- **Defensible security baseline** - Grounded in how your environment actually operates—not theory

- **Prioritized risk view** - Focus on what matters most—not a long list of abstract findings
- **30/60/90-day action plan inputs** - Clear next steps with realistic timelines
- **Practical foundation** - Ready for roadmap planning, compliance readiness, and board communication

The Plurilock CISO 360 Advantage

This assessment is designed for leaders who need **clarity, alignment, and forward momentum**—not another binder that gathers dust..

What makes CISO 360 different:

- **Practical, not theoretical** - Experience-driven baseline grounded in how your environment actually operates, not abstract maturity models
- **Operational, not checkbox** - Domain-by-domain review of how teams really work and where gaps exist in practice
- **Prioritized, not overwhelming** - Clear view of what matters most right now with actionable next steps
- **Actionable, not shelf-ware** - Executive-ready foundation that translates directly into board communications, roadmap planning, and compliance

Schedule Your CISO 360 Baseline Assessment: Gain the clarity your leadership team needs to make informed security decisions.

Advanced cybersecurity and Zero Trust Security assessments and consulting
IT products and solutions
Professional services
Managed services

Plurilock Services

Zero Trust

Design and implementation of zero trust architectures (ZTAs)

Data Protection

Protection of intellectual property and digital assets

Identity and Access Management

Design, implementation, and integration of complete identity and access management (IAM)

Public Key Infrastructure

Design and implementation of modern public key infrastructure (PKI) deployments

Offensive Security

Security assessments and tests with a hacker mindset

Penetration Testing as a Service (PTaaS)

Managed service providing continuous penetration testing to rapidly surface emerging vulnerabilities

Data Protection as a Service (DPaaS)

Managed data protection service to operate DLP and insider threat capabilities as a service

Emergency Support

Immediate, cross functional team for urgent and high impact IT and cyber problems

Selection of current and past customers that can be publicly represented
