

# Cloud safety and data loss prevention.

Advanced access control. Endpoint-based DLP.

Plurilock AI  
DLP

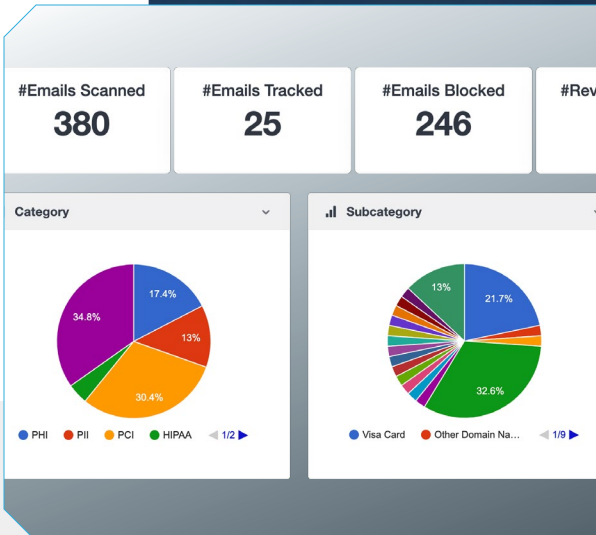

## THE PROBLEM

### Data travels fast—including where it shouldn't.

You're awash in a sea of cloud applications, employees, employee devices, and sensitive company data.

How do you keep your apps safe when employees need to remember lists of constantly changing passwords? How do you ensure that company resources are open only to authorized users on work devices during work time? How do you keep your cloud data from escaping to those devices?

Can you solve these problems with the budgets and team you have?

## THE SOLUTION

### Plurilock AI DLP secures your cloud world.

#### Single sign-on

Enable one login to serve all of an employee's apps—whether those apps support single sign-on via SAML or not.

#### Least privilege

Grant access on a least privilege basis using time, location, device, and duration controls applied with granularity.

#### Cloud app control

Specify who can access, edit, and share cloud files and resources, and what can and can't be stored in them.

#### Email DLP

Ensure that email containing sensitive or dangerous data is stopped in its tracks, before delivery occurs.

#### Endpoint DLP

Prevent sensitive downloads, data copy-paste, and the use of personal apps or email while using company resources.

#### Future Proof

Deploy knowing that if your security needs grow in complexity, Plurilock AI grows too—no expensive rip-and-replace.

## HOW IT WORKS

### Gain control of your cloud applications and your endpoints.

Plurilock AI DLP pairs the simple, powerful Plurilock AI Cloud platform with a lightweight data loss prevention agent for your employees' endpoints, ensuring cloud safety on your terms.

#### Establish access control

Provide single sign-on (SSO) to your users and control access to company resources on a least-privilege basis with powerful, flexible access control policies.

#### Stop data misbehavior

Keep users of company resources from downloading, copying, pasting, or sharing work data to unauthorized individuals, externals, or personal accounts.

#### Achieve compliance

Limit use of company resources to business hours. Block personal email and personal developer accounts. Grant or deny for specific devices and locations.

## Why Plurilock AI is Different

Unique support for cloud applications that don't natively offer SSO compatibility. Unique access controls for least privilege. Exclusion of personal software and sharing.

The Plurilock AI platform provides more comprehensive least privilege and DLP capability—in a single platform.

## Why Plurilock AI Matters

Work now happens in the cloud across many applications and platforms, and the steady, year-over-year growth in major data breaches is a side effect of this complexity.

Plurilock AI makes employee life simpler and company data safer in an era of growing cyber-risk.

## SSO COMPATIBILITY

- Cloud applications offering security assertion markup language (SAML) support for single sign-on (SSO) access
- Cloud applications not offering SAML support through user login simulation through existing login workflows
- Active directory and LDAP integration

## NATIVE MFA CAPABILITY

- Temporary one-time password (TOTP) code provision
- FIDO2 passkey via mobile

## ACCESS CONTROL

- IP address
- Time of day
- Geolocation
- Device ID
- Browser version

## CASB COMPATIBILITY

- Google Workspace (formerly G Suite)
- Google Drive
- Microsoft 365 (formerly Office 365)
- Microsoft OneDrive

## EMAIL DATA LOSS PREVENTION

- Regex ruleset creation
- Google Gmail
- Microsoft Outlook and E3+ email

## ENDPOINT DATA LOSS PREVENTION

- Preview notify or block
- Local download notify or block
- Clipboard copy-paste notify or block
- Delete notify or block
- Attachment download notify or block
- External transmission notify or block
- Containerization
- USB device block

## PERSONAL DATA AND ACCOUNT BLOCK

- Google Workspace / Gmail
- Microsoft 365
- Dropbox
- Github

## DEPLOYMENT

- Lightweight endpoint agent (Windows, Mac OS, Linux)
- Browser extension

## Plurilock AI: Least privilege solutions

- ▶ **Plurilock AI Cloud**  
Single sign-on, access control, and email data safety
- ▶ **Plurilock AI DLP**  
Single sign-on, access control, email data safety, and agent-based data loss prevention (DLP)
- ▶ **Plurilock DEFEND™**  
Continuous authentication and risk scoring behavioral biometrics
- ▶ **Plurilock AI Complete**  
Single sign-on, access control, data loss prevention, and continuous authentication with integrated DEFEND™ technology for real-time least privilege and risk scoring
