Protect Your Critical Data

Managed data protection service to operate DLP and insider threat capabilities as a service

Prevent, Detect, and Respond to Data Threats—Effortlessly.

Plurilock's Managed Data Protection Services provide a proactive, always-on approach to securing sensitive information, preventing insider threats, and ensuring regulatory compliance. By integrating advanced data discovery, classification, and monitoring capabilities, we help organizations protect critical assets from unauthorized access and exfiltration. With real-time insights, automated enforcement, and expert oversight, Plurilock delivers next-generation data protection that goes beyond conventional, reactive security measures.

Discover, Classify, and Secure Your Data

You can't protect what you don't know exists. Many organizations struggle with shadow data—sensitive information stored across endpoints, cloud applications, and networks without visibility or control. Our Data Discovery and Classification solutions bring clarity by identifying and categorizing sensitive data across your IT environment.

- Real-time data monitoring and anomaly detection

- Active data exfiltration prevention and encryption management

- Cloud access security broker (CASB) integration and oversight

- Endpoint and network data loss prevention (DLP)

- Incident response and forensic analysis

WHAT CUSTOMERS SAY

"[Plurilock] was onsite immediately...they worked tirelessly to restore our network and get us back up and running... With [Plurilock's] help we were able to recover large portions of what was lost through backups and other methods.

[Plurilock] turned a major disaster that would have been very difficult to recover from into a minor inconvenience. They've always been marvelous in responding quickly; usually they get a technician out to us the same day we call. We're very confident in [Plurilock's] ability to deliver on what we need."

Advanced cybersecurity and Zero Trust
Security assessments and consulting
IT products and solutions
Professional services
Managed services

Plurilock Services

Zero Trust

Design and implementation of zero trust architectures (ZTAs)

Data Protection

Protection of intellectual property and digital assets

Identity and Access Management

Design, implementation, and integration of complete identity and access management (IAM)

Public Key Infrastructure

Design and implementation of modern public key infrastructure (PKI) deployments

Offensive Security

Security assessments and tests with a hacker mindset

Penetration Testing as a Service (PTaaS)

Managed service providing continuous penetration testing to rapidly surface emerging vulnerabilities

Data Protection as a Service (DPaaS)

Managed data protection service to operate DLP and insider threat capabilities as a service

Emergency Support

Immediate, cross functional team for urgent and high impact IT and cyber problems

Selection of current and past customers that can be publicly represented
