

Build Automation-Driven Security Operations That Scale and Recover Fast

70%

of SOC teams struggle with alert fatigue and lack the specialized expertise needed for 24x7 operations and advanced threat detection.

Modern security operations require automation-driven workflows that can scale with growing infrastructure while maintaining rapid response capabilities. Most organizations face outdated CMDB data, alert fatigue from untuned detection systems, skills gaps in specialized domains, and insufficient resources for around-the-clock monitoring.

SecOps Excellence Through Integration and Automation

Plurilock's SOC Operations and Support practice delivers comprehensive services that modernize your security operations center through intelligent automation, continuous improvement, and expert-led operations. We build resilience through real-time asset intelligence, exposure-focused vulnerability operations, hardened endpoint protection, and professional incident response.

Core SOC Services

SecOps Modernization

- **SecOps and CMDB Modernization**
Real-time asset intelligence and configuration management
- **Exposure Management Operations**
Continuous vulnerability and threat exposure tracking
- **Security Tool Integration**
Unified security platform integration and orchestration

Detection and Response

- **EDR/XDR Deployment**
Endpoint detection and response implementation and hardening
- **Managed Detection and Response (MDR)**
24x7 threat detection, investigation, and response
- **SOC Staffing and Support**
Augmented SOC team resources and expertise

Infrastructure and Incident Response

- **PKI and Certificate Management**
Public key infrastructure lifecycle management
- **24x7 Incident Response**
Round-the-clock security incident management
- **Digital Forensics and Hunting**
Advanced threat hunting and forensic investigation
- **SIEM/SOAR Operations**
Security information and event management optimization

Common Challenges

- Alert fatigue overwhelms analysts >
- Outdated CMDB undermines decisions >
- Skills gaps in specialized domains >
- Insufficient 24x7 resources >

Plurilock Differentiators

- ✓ Expert-led tuning reduces noise by 60%
- ✓ Real-time asset discovery for accurate threat context
- ✓ Certified experts across all SOC disciplines
- ✓ Flexible staffing from augmentation to fully managed MDR

Advanced cybersecurity and Zero Trust
Security assessments and consulting
IT products and solutions
Professional services
Managed services

Plurilock Services

Zero Trust

Design and implementation of zero trust architectures (ZTAs)

Data Protection

Protection of intellectual property and digital assets

Identity and Access Management

Design, implementation, and integration of complete identity and access management (IAM)

Public Key Infrastructure

Design and implementation of modern public key infrastructure (PKI) deployments

Offensive Security

Security assessments and tests with a hacker mindset

Penetration Testing as a Service (PTaaS)

Managed service providing continuous penetration testing to rapidly surface emerging vulnerabilities

Data Protection as a Service (DPaaS)

Managed data protection service to operate DLP and insider threat capabilities as a service

Emergency Support

Immediate, cross functional team for urgent and high impact IT and cyber problems

Selection of current and past customers that can be publicly represented
