Plurilock
CRITICAL SERVICES

Cloud Visibility & Assurance Assesment

Comprehensive Cloud Assessment, Reporting, and Analysis

Cloud Visibility

82% of organizations ack full visibility into their cloud security posture and spending

Cloud environments grow complex quickly—making it difficult to maintain security compliance, understand actual resource usage, and control costs. Plurilock delivers comprehensive Cloud Security Posture and Cost Optimization services that provide complete visibility into your cloud infrastructure, validate compliance against multiple frameworks, and identify opportunities to optimize spending. Our assessments combine security analysis, compliance reporting, and financial intelligence to help you secure your cloud environment while maximizing ROI.

Advisory and Assessment Services

Security Posture Analysis

Current State Security Assessment

- Comprehensive evaluation of your current cloud security posture
- Identification of misconfigurations and security gaps
- Risk prioritization across your cloud infrastructure
- Multi-cloud environment analysis (AWS, Azure, GCP)

Compliance Issue Prioritization

- Risk-based prioritization of compliance findings
- Remediation roadmap development
- Critical vulnerability identification
- Security control effectiveness evaluation

Compliance Reporting and Validation

Multi-Framework Compliance Assessment

Comprehensive compliance reporting across multiple frameworks and standards

Support for industry-leading compliance frameworks including:

- NIST Cybersecurity Framework
- CIS Benchmarks
- PCI DSS
- Custom control sets tailored to your requirements

Compliance Documentation and Evidence

- Detailed compliance reports with findings and evidence
- Gap analysis against target compliance state
- Control mapping and coverage analysis
- Continuous compliance monitoring recommendations

Cloud Resource Intelligence

Resource Visibility and Inventory

Complete Resource Discovery

- Comprehensive inventory of all cloud resources in use
- Shadow IT and unauthorized resource identification
- Resource ownership and classification mapping
- Multi-account and multi-region visibility

Resource Utilization Analysis

- Identification of underutilized or idle resources
- Right-sizing recommendations
- Resource lifecycle management assessment
- Architecture optimization opportunities

Cloud Cost Optimization

Financial Analysis and Cost Intelligence

Comprehensive Cost Analysis

- Detailed breakdown of cloud spending by resource type
- Account-level cost attribution and analysis
- Department and project cost allocation
- Trend analysis and forecasting

Tagging and Cost Allocation Improvement

- Tagging strategy development and implementation
- Cost center and business unit attribution
- Chargeback and showback reporting
- Improved financial accountability and transparency

Cost Optimization Recommendations

- Identify cost-saving opportunities across your environment
- Reserved instance and savings plan analysis
- Unused resource identification and elimination
- Architecture recommendations for cost efficiency

Typical Assessment Deliverables

- Cloud Security Posture Assessment Report with prioritized findings
- Multi-framework Compliance Report (NIST, CIS, PCI, Custom)
- Complete Cloud Resource Inventory and Classification
- Cost Analysis Report with spending breakdown by resource and account
- Tagging Strategy and Implementation Plan
- Cost Optimization Roadmap with projected savings
- Security and Compliance Remediation Roadmap
- Executive Summary for leadership communication

Managed services

Plurilock Services

Zero Trust

Design and implementation of zero trust architectures (ZTAs)

Data Protection

Protection of intellectual property and digital assets

Identity and Access Management

Design, implementation, and integration of complete identity and access management (IAM)

Public Key Infrastructure

Design and implementation of modern public key infrastructure (PKI) deployments

Offensive Security

Security assessments and tests with a hacker mindset

Penetration Testing as a Service (PTaaS)

Managed service providing continuous penetration testing to rapidly surface emerging vulnerabilities

Data Protection as a Service (DPaaS)

Managed data protection service to operate DLP and insider threat capabilities as a service

Emergency Support

Immediate, cross functional team for urgent and high impact IT and cyber problems

Selection of current and past customers that can be publicly represented
